

2002 Small Business Profile: TEXAS

The events of 2001 posed critical challenges to the state of Texas as well as the nation. Nevertheless, the economic health of Texas benefited from its small businesses (those with fewer than 500 employees). Small businesses are an important source of new jobs in the state. The small business sector also provides opportunities for women and minorities and is a continual source of innovation and invention. These qualities proved to be economically beneficial to Texas last year.

Number of Businesses. The number of employer businesses in 2001 increased by 0.5 percent, and the number of self-employed individuals increased by an estimated 0.8 percent. Employer businesses numbered 390,390 in 2001. The most recent data by firm size (1999) indicate that 98.6 percent of businesses in the state were small. In 2001, an estimated 823,934 individuals were self-employed. (Source: U.S. Dept. of Labor, Employment and Training Administration; U.S. Dept. of Commerce, Census Bureau; U.S. Dept. of Labor, Bureau of Labor Statistics)

Women-Owned Businesses. Women owned 25.0 percent of the state's firms in 1997 and generated \$65.1 billion in revenues. Of the state's total women-owned businesses, 16.6 percent had employees. (Source: U.S. Dept. of Labor, Bureau of Labor Statistics, U.S. Dept. of Commerce, Census Bureau)

Minority-Owned Businesses. The latest (1997) Census data indicate that minority-owned businesses totaled 365,500 and made up 24.0 percent of the state's businesses, of which 19.6 percent were employer firms. (Source: U.S. Dept. of Commerce, Census Bureau)

Business Turnover. In 2001, there were 53,271 new employer firms, or 1.9 percent fewer new employer firms than in 2000. Business bankruptcies totaled 3,155 in 2001, an increase of 21.7 percent over 2000, while business terminations amounted to 59,342, an increase of 3.6 percent over 2000. (Source: U.S. Dept. of Labor, Employment and Training Administration; Administrative Office of the U.S. Courts; U.S. Dept. of Commerce, Census Bureau)

Employment. Small businesses employed 3,621,544 or 46.6 percent of the state's 7,763,815 employees (non-farm private sector) in 1999. The industry with the most small business employees was health care and social assistance. The total number of small employer firms in 1999 was 361,108 (Table 1). (Source: U.S. Dept. of Commerce, Census Bureau, Statistics of U.S. Businesses)

Small Business Income. Proprietors' income—a partial measure of small business income—totaled \$81.3 billion in 2001, an increase of 4.5 percent over 2000. (Source: U.S. Dept. of Commerce)

Finance. Often, small businesses use commercial lenders and rely on local bank services. Over the last five years, the number of banks in the state has decreased. The Office of Advocacy has identified the small-business-friendly banks within the state and has published the names in its banking studies report. (See Table 2 for the number of banks by asset size.) Small businesses seeking loans should also consider lenders that participate in the SBA's preferred or certified loan programs; for a list of these lenders, call the Small Business Answer Desk at (800) 827-5722.

For additional information on the Office of Advocacy's research reports, data, and analyses on small business, visit www.sba.gov/advo/stats or call (202) 205-6530.

Note: Data on women-owned and minority-owned firms are not comparable between 1992 and 1997, so growth rates are not available. Data on minority owners may not sum to the total because an owner may belong to more than one minority group.

Table 1. Firms and Employment in Texas by Industry and Firm Size (Thousands), 1999

Industry	Non-employer Firms	Employer Firms		Employment	
		Total	<500	Total	<500
Total	1,236.9	366.1	361.1	7,763.8	3,621.5
